

How do I open measurements from a saved .csv file?

You can open your saved .csv files via the Resus PC Dashboard.
(for reading out your Risycor, see TT06)

What do I have to do?

1. Open Resus PC Dashboard.
2. Go to 'Analyse measurements'.
3. Click on 'View measurements from file'
4. Navigate to the saved .csv file on your PC.
5. The data will be loaded in the dashboard.
6. It is possible to open multiple files in the same view to help with system analysis.
